FalconRice.com

Tradewinds software has been with Falcon Rice Mill since the early 1990's. As a mill with limited resources, we needed a software program that could handle the production aspects of the business as well as the day to day financials. Randy Rich was able to create this product for us from scratch. In addition to the initial program, Randy was with our company throughout the years tweaking and customizing the program to meet our needs. It is amazing what he can do. There are many accounting programs out there; however, they are either geared for huge organizations or very small business. Randy was able to create a product that is perfect for a mid market company.

It would be very difficult to run our business without Randy Rich and Tradewinds.

Sincerely,

Robert Trahan, CPA
